

RAJAT KUMAR PARIDA

Houston, TX | +1(940)-309-0096 | rajatkumarparida0105@gmail.com | [linkedin.com/in/rajatparida33](https://www.linkedin.com/in/rajatparida33) | github.com/RajatProg

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience designing, developing, testing, and deploying scalable web applications and backend services using C#, .NET Core, Python, React, SQL, and cloud-native infrastructure. Built and shipped production AI-powered applications using LangChain, OpenAI GPT API, and RAG architecture. Experienced with RESTful APIs, microservices, Docker, Kubernetes, Terraform, AWS, Azure, and CI/CD pipelines. Strong background in financial services software at a Fortune 500 life insurer with compliance, RBAC, OAuth 2.0, and high-availability production systems. Mentors junior engineers, participates in code reviews, and collaborates across Agile cross-functional teams. MS in Computer Science, GPA 3.82. AWS Certified Developer Associate and AWS Certified AI Practitioner.

TECHNICAL SKILLS

Languages and Frameworks: C#, Python, JavaScript, TypeScript, .NET Core, ASP.NET Core Web API, ASP.NET MVC, FastAPI, React, Angular, React Native, Node.js, HTML5, CSS3, LINQ, Entity Framework Core

AI and ML: LangChain, OpenAI GPT API, RAG Architecture, FAISS, Prompt Engineering, Python (pandas, NumPy, scikit-learn, TensorFlow, Keras), MLflow, FastAPI Model Serving

Cloud and Infrastructure: AWS (EC2, RDS, S3, Lambda, IAM, SageMaker), Azure (App Services, DevOps, Pipelines, Functions), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Query Optimization, Stored Procedures, ETL Pipelines

Security and Auth: OAuth 2.0, OpenID Connect, JWT, RBAC, Secure Coding, Claims-Based Authorization

Testing and Quality: NUnit, xUnit, Unit Testing, Integration Testing, Regression Testing, UAT, Code Reviews, Debugging, Root Cause Analysis

Monitoring and Observability: Splunk, OpenTelemetry, Application Insights, Prometheus, Grafana, ServiceNow

Collaboration and Tools: Agile/Scrum, Jira, Confluence, Git, GitHub, Azure DevOps, Technical Documentation, Mentoring

CERTIFICATIONS

AWS Certified Developer Associate | AWS Certified AI Practitioner

PROFESSIONAL EXPERIENCE

Asuitech Solutions Inc.

Aug 2025 – Present

.NET Developer

Houston, TX

- Collaborate with business analysts and stakeholders to translate functional requirements into scalable backend solutions using C#, .NET Core, and ASP.NET Core Web API across distributed enterprise services deployed on Azure App Services via CI/CD pipelines.
- Write and optimize SQL Server stored procedures and ETL data pipelines, automating data ingestion and validation workflows across 5+ cross-functional teams.
- Maintain daily system operations across distributed enterprise applications including data maintenance, validation reporting, and issue tracking via ServiceNow, ensuring data integrity across live production systems.
- Lead incident retrospectives and root cause analysis using Splunk, creating corrective action documentation and cutting mean time to resolution by 25%.
- Document and maintain API workflows and system runbooks in Confluence and Jira, standardizing best practices and keeping process documentation current across all designated systems.

Midwestern State University

Jan 2025 – May 2025

Graduate Research Assistant

Wichita Falls, TX

- Identified gaps in MSU's existing campus dining system and led end-to-end design and development of SwipeIn, a student-facing dining intelligence platform built in React Native tracking every student transaction, meal plan usage, swipe activity, and flex dollar balances, deployed across web, iOS, and Android serving thousands of campus users. Presented at the North Texas Area Student Conference.
- Designed and maintained SQL Server data models and stored procedures for multi-table financial transaction queries, supporting operational reporting and data integrity validation.
- Deployed cloud-native services on AWS (EC2, RDS, S3, Lambda) using Docker, Kubernetes, Terraform, and GitHub Actions CI/CD, coordinating go-live support and post-deployment validation.
- Cut manual operational interventions by 40% by building an LLM-powered assistant using Python, LangChain, OpenAI GPT API, and RAG architecture, automating routine operational workflows.
- Continued C++ instruction for undergraduate CS1 students as part of concurrent teaching assistant duties, translating complex technical concepts into accessible guidance for non-technical learners.

Midwestern State University

Aug 2024 – Dec 2024

Graduate Teaching Assistant - Developer

Wichita Falls, TX

- Built an end-to-end Python ML pipeline on 5,000+ clinical records covering data ingestion, preprocessing, and feature engineering. Deployed as a FastAPI REST API with automated testing pipelines enforcing production quality standards.
- Improved AUC-ROC by 12% over baseline through iterative hyperparameter tuning, achieving 94.7% predictive accuracy with MLflow experiment tracking across 15+ iterations.
- Completed graduate-level Network Security coursework covering TCP/IP networking, DNS, network vulnerability analysis, and secure network design, producing an original research paper.
- Instructed C++ programming to undergraduate CS1 students across a full academic year, covering control flow, functions, data structures, and object-oriented programming, conducting office hours and evaluating coursework each semester.

Cognizant Technology Solutions (National Life Group)

Aug 2021 – Jul 2023

Software Engineer - .NET Developer

India

- Verified insurance payment calculations and corrected financial data across agent, customer, and plan admin policy systems at a Fortune 500 life insurer, validating all changes in code and obtaining peer review sign-off before UAT deployment.
- Owned end-to-end SDLC validation for insurance backend services, reviewing and signing off every code change through UAT and production deployments to ensure zero-defect promotion across all release cycles.
- Applied advanced Excel for post-deployment and UAT validation of system links, portal data, and financial records across insurance policy systems, ensuring accuracy and data integrity against business requirements.
- Wrote and executed SQL Server stored procedures for multi-table queries across policyholder, payment, and annuity data systems, supporting data validation, operational reporting, and financial data integrity checks.
- Documented and maintained standard operating procedures (SOPs), KEDBs, and Confluence pages for insurance financial systems, standardizing workflow documentation and best practices across the support team.
- Managed end-to-end change management workflows from Scrum planning through Excel requirement documentation, RITM and REQ creation in ServiceNow, and Confluence sign-off to production deployment.
- Participated in Agile ceremonies and cross-team collaboration, documenting technical solutions and operational workflows in Jira and Confluence to promote adoption of standard processes and best practices.
- Resolved 100+ weekly P1-P4 system incidents via ServiceNow, cutting resolution time by 40% through root cause analysis, Splunk log correlation, and structured corrective action documentation.
- Mentored junior engineers through code reviews and structured knowledge transfer sessions, improving team adherence to coding standards and deployment practices in a high-compliance financial services environment.

Cognizant Technology Solutions

Feb 2021 – Jul 2021

Programmer Analyst

India

- Built a full-stack Library Management System using ASP.NET Web API, Angular, and SQL Server with EF Core (Code-First), OAuth 2.0 authentication, and RBAC, achieving 99.9% uptime through Splunk monitoring.
- Achieved 95% unit test coverage with NUnit, reducing post-deployment defects by 60% and cutting API response times by 25% through SQL query optimization and EF Core tuning.
- Accelerated sprint delivery by 40% by automating backend workflows for financial transaction processing and record update pipelines.

EDUCATION

Midwestern State University, Wichita Falls, TX

Aug 2023 – May 2025

Master of Science, Computer Science | GPA: 3.82

Institute of Aeronautical Engineering

Jul 2017 – Aug 2021

Bachelor of Technology, Electronics and Communication Engineering | GPA: 3.6
